## inflammatory response

regulation of inflammatory response positive regulation of defense response

regulation of defense response

negative regulation of cytokine production

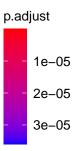

regulation of leukocyte cell-cell adhesion defense response to symbiont

leukocyte cell-cell adhésion leukocyte prolifermésponse to interferon-gamma negative regulation of immdefense mesponse to virus regulation of lymphocyte proliferation proliferationesponse to virus

lymphocyte activation lymphocyte proliferation regulation of leukocyte proliferation

regulation of mononuclear cell proliferation

adaptive immune response

number of genes

30

extracellular structure organization

extracellular matrix organization

antigen processing and presentation of endogenous antigen

external encapsulating structure organization

angiogenesis

regulation of vasculature development

regulation of angiogenesis
